WORK EXPERIENCE

Passionworks - Intern | Athens, OH | May. 2026–Aug. 2026

- Collaborated with artists with developmental disabilities and studio staff to launch a new owl plush product line, expanding studio offerings and contributing to increased revenue.
- Designed production templates and workflows to improve efficiency, consistency, and productivity.
- Assisted with daily production, product design, and festival preparation to support studio operations and community engagement.

IntrustHR - Graphic Design Intern | Frisco, TX | Jun. 2025 – Jul. 2025

- Established typography and color standards improving visual consistency across brand and marketing materials.
- Designed 5+ reusable social media templates used across multiple marketing campaigns, reducing design production time and improving brand consistency.
- Collaborated with a small team to apply design thinking principles to branding and marketing objectives.

Tomorrow's Leaders Today, Inc. (TLT) - Graphic Design Intern | Frisco, TX | May. 2025 – Jul. 2025

- Designed 10+ digital and print graphics supporting community outreach initiatives and youth programs.
- Designed promotional graphics and brochures elevating engagement for organizational events.
- Worked with UX researchers to gather insights that informed design improvements.

PROJECTS

Care Compass - UX Design-a-thon, 1st Place for BSWH Track| October 2026

- Redesigned MyBSWHealth's "Help Me Decide" care-navigation chat into a conversational AI tool that helps users find the right care and understand why it was recommended.
- Conducted a cognitive walkthrough and a survey of 61 users, which showed that only 1 knew the original tool existed. That finding led us to move the tool onto the homepage.
- Created a persona, a journey map, and hi-fi prototypes with sentiment analysis, photo symptom input, and autofilled appointments, then refined them through usability testing with 13 users.

EcoLink - UX Research Project | October 2025-November 2025

- Designed an IoT-based platform that connected real-time climate and wildlife data for researchers, park rangers, and citizen scientists.
- Conducted user research and developed user flows to identify information needs and improve data accessibility.
- Created wireframes and interface concepts that simplified environmental monitoring and supported informed decision-making.

EDUCATION

University of Texas at Dallas

Bachelor of Arts, Technology, and Emerging Communications | Richardson, TX | 2024 – 2028

- GPA: 3.73 | Honors College | Honors Mentor | UX Club
